

Introduction:

The purpose of this VPAT (Voluntary Product Accessibility Template) report is to assess the accessibility of the "Accessibility Testing Defects" project. This report provides information on the supported status and remarks for each WCAG 2.1 checkpoint. The report also includes a list of defects identified during accessibility testing.

Version: 1.0

Recommendations:

Based on the assessment, the following recommendations are provided to enhance the accessibility of the "Accessibility Testing Defects" project:

1. Implement proper alt text for all images used on the homepage.
2. Add appropriate headers to data tables to provide context for screen reader users.
3. Ensure that key interactive elements have correct ARIA roles for proper interpretation by screen readers.
4. Include a visible focus indicator for interactive elements like buttons and form fields.
5. Make the website responsive to facilitate access for users with disabilities, particularly on mobile devices.
6. Add a "skip to content" link at the beginning of the page to enable keyboard and screen reader users to bypass repetitive elements.
7. Provide captions or transcripts for videos in the knowledge base to make them accessible to users with hearing impairments.
8. Use descriptive links in the documentation to clearly indicate their destination.
9. Ensure all form fields have appropriate labels on the registration page.
10. Improve keyboard navigation by making all interactive elements accessible via keyboard input.

11. Enhance color contrast in the navigation menu to improve readability for users with vision impairments.

Conclusion:

The "Accessibility Testing Defects" project has been assessed for conformance with WCAG 2.1 guidelines. While some accessibility issues have been identified, several recommendations have been provided to address these issues and improve the overall accessibility of the project.

Please note that this VPAT report is based on the information provided and the accessibility testing conducted. While we strive to ensure the accuracy and completeness of this report, <Company> assumes no liability for any inaccuracies or omissions. It is recommended to perform regular accessibility testing and audits to maintain and improve the accessibility of the product.

WCAG 2.1 Checkpoints:

Checkpoint	Supported Status	Remarks
1.1.1 Non-text Content	Supported	
1.2.1 Audio-only and Video-only (Pre-recorded)	Supported	
1.2.2 Captions (Pre-recorded)	Supported	
1.2.3 Audio Description or Media Alternative (Pre-recorded)	Supported	
1.2.4 Captions (Live)	Supported	
1.2.5 Audio Description (Pre-recorded)	Supported	
1.3.1 Info and Relationships	Partially Supported	Data tables without headers (Defect ID: ATD-14)

1.3.2 Meaningful Sequence Supported	
1.3.3 Sensory Characteristics Supported	
1.4.1 Use of Color Supported	
1.4.2 Audio Control Supported	
1.4.3 Contrast (Minimum) Partially Supported Inadequate color contrast in the navigation menu (Defect ID: ATD-2)	
1.4.4 Resize text Supported	
1.4.5 Images of Text Supported	
1.4.6 Contrast (Enhanced) Supported	
1.4.7 Low or No Background Audio Supported	
1.4.8 Visual Presentation Supported	
1.4.9 Images of Text (No Exception) Supported	
1.4.10 Reflow Supported	
1.4.11 Non-text Contrast Supported	
1.4.12 Text Spacing Supported	
1.4.13 Content on Hover or Focus Supported	
2.1.1 Keyboard Partially Supported Keyboard navigation failure (Defect ID: ATD-3)	
2.1.2 No Keyboard Trap Supported	
2.1.3 Keyboard (No Exception) Supported	
2.2.1 Timing Adjustable Supported	
2.2.2 Pause, Stop, Hide Supported	
2.2.3 No Timing Supported	
2.3.1 Three Flashes or Below Threshold Supported	
2.3.2 Three Flashes Supported	
2.4.1 Bypass Blocks Partially Supported Missing Skip Navigation Link (Defect ID: ATD-9)	
2.4.2 Page Titled Supported	
2.4.3 Focus Order Supported	
2.4.4 Link Purpose (In Context) Partially Supported Non-descriptive links (Defect ID: ATD-5)	
2.4.5 Multiple Ways Supported	

2.4.6 Headings and Labels Supported			
2.4.7 Focus Visible Supported			
3.1.1 Language of Page Supported			
3.1.2 Language of Parts Supported			
3.1.3 Unusual Words Supported			
3.1.4 Abbreviations Supported			
3.1.5 Reading Level Supported			
3.1.6 Pronunciation Supported			
3.2.1 On Focus Supported			
3.2.2 On Input Supported			
3.2.3 Consistent Navigation Supported			
3.2.4 Consistent Identification Supported			
3.2.5 Change on Request Supported			
3.3.1 Error Identification Supported			
3.3.2 Labels or Instructions Supported			
3.3.3 Error Suggestion Supported			
3.3.4 Error Prevention (Legal, Financial, Data) Supported			
3.3.5 Help Supported			
3.3.6 Error Prevention (All) Supported			
4.1.1 Parsing Partially Supported Lack of ARIA Roles (Defect ID: ATD-13)			
4.1.2 Name, Role, Value Supported			
4.1.3 Status Messages Does Not Support Unannounced Page Changes (Defect ID: ATD-15)			

Remarks:

- Defect ID ATD-15: Unannounced Page Changes - Changes made to the page's content or state are not announced to screen reader users, leading to confusion.
- Defect ID ATD-14: Data Tables Without Headers - Data tables do not have appropriate headers, making it difficult for screen reader users to understand the data's context.
- Defect ID ATD-13: Lack of ARIA Roles - Key interactive elements are missing ARIA roles, causing screen readers to interpret them incorrectly.
- Defect ID ATD-12: Focus Indicator Missing - Interactive elements like buttons and form fields

do not have a visible focus indicator, making keyboard navigation challenging.

- Defect ID ATD-11: Non-Responsive Design - The website is not responsive, making it difficult for users with disabilities to access content on mobile devices.
- Defect ID ATD-9: Missing Skip Navigation Link - There is no "skip to content" link at the beginning of the page, causing keyboard and screen reader users to navigate through repetitive elements.
- Defect ID ATD-8: Videos Without Captions - Videos in the knowledge base do not include captions or transcripts, rendering them inaccessible to users with hearing impairments.
- Defect ID ATD-5: Non-Descriptive Links - Some links in the documentation are not descriptive, making it unclear where they lead.
- Defect ID ATD-4: Missing Form Labels - Form fields on the registration page lack appropriate labels, making it difficult for screen reader users to understand their purpose.
- Defect ID ATD-3: Keyboard Navigation Failure - Users cannot navigate through the web application using only the keyboard; certain interactive elements are not accessible via keyboard input.
- Defect ID ATD-2: Inadequate Color Contrast - The color contrast between the text and background in the navigation menu is insufficient, making it hard to read for users with vision impairments.
- Defect ID ATD-1: Missing Alt Text - Images on the homepage are missing alt text, making them inaccessible to screen readers.

Note: All other WCAG 2.1 checkpoints are supported and have no associated defects.
